This document supports Firmware Version 2.14.97 and above.
WARRANTY

Tektronix warrants that this product will be free from defects in materials and workmanship for a period of one (1) year from the date of shipment. If any such product proves defective during this warranty period, Tektronix, at its option, either will repair the defective product without charge for parts and labor, or will provide a replacement in exchange for the defective product.

In order to obtain service under this warranty, Customer must notify Tektronix of the defect before the expiration of the warranty period and make suitable arrangements for the performance of service. Customer shall be responsible for packaging and shipping the defective product to the service center designated by Tektronix, with shipping charges prepaid. Tektronix shall pay for the return of the product to Customer if the shipment is to a location within the country in which the Tektronix service center is located. Customer shall be responsible for paying all shipping charges, duties, taxes, and any other charges for products returned to any other locations.

This warranty shall not apply to any defect, failure or damage caused by improper use or improper or inadequate maintenance and care. Tektronix shall not be obligated to furnish service under this warranty a) to repair damage resulting from attempts by personnel other than Tektronix representatives to install, repair or service the product; b) to repair damage resulting from improper use or connection to incompatible equipment; or c) to service a product that has been modified or integrated with other products when the effect of such modification or integration increases the time or difficulty of servicing the product.
THIS WARRANTY IS GIVEN BY TEKTRONIX WITH RESPECT TO THIS PRODUCT IN LIEU OF ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED. TEKTRONIX AND ITS VENDORS DISCLAIM ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. TEKTRONIX’ RESPONSIBILITY TO REPAIR OR REPLACE DEFECTIVE PRODUCTS IS THE SOLE AND EXCLUSIVE REMEDY PROVIDED TO THE CUSTOMER FOR BREACH OF THIS WARRANTY. TEKTRONIX AND ITS VENDORS WILL NOT BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES IRRESPECTIVE OF WHETHER TEKTRONIX OR THE VENDOR HAS ADVANCE NOTICE OF THE POSSIBILITY OF SUCH DAMAGES.

Controls and Menus Reference
Frequency/Markers Controls
Moves marker to highest on-screen signal.

Press once for center measure (counts signal).
Press twice for signal track mode.
Press again for tracking off.

Depending upon mode, FREQ/MKRS knob changes:
• Center or start frequency
• Marker position
• Video line number for triggering
Knob also selects letters for titles and labels.

Press once for single marker.
Press twice for delta markers.
Press again for markers off.

Moves markers left or right to next on-screen signal above threshold.
Fundamental Controls

Selects channel, frequency, span/div, or ref level for immediate entry. Enter value from keypad and end entry with terminator key [W], [X], [Y], or [Z].

- Press once for zero span mode (time domain); press again to restore previous span/div.
- Press once for max span mode (180 MHz/div); press again to restore previous span/div.
Decrease (↓) or increase (↑) channel or frequency by one division in auto tuning mode or by the designated increment in other modes. ALWAYS ACTIVE.

Decrease (↓) or increase (↑) span/div in 1-2-5 sequence. ALWAYS ACTIVE.

Decrease (↓) or increase (↑) ref level in 1 dB or 10 dB steps. ALWAYS ACTIVE.

Toggle ref level step size between 1 dB (FINE LED on) and 10 dB (FINE LED off).

Choose REF LEVEL units: [INPUT]3[0–5] (not available in CATV mode).

Select fixed RF Atten value in 2 dB increments or select AUTO Atten: [INPUT]5.
Numeric Keypad

Dot Key:
- Decimal in numeric entries
- Period in text entries
Numeric Keys 0-9:
- Enter numeric values
- Make menu selections

Terminator Keys W, X, Y, Z:
- Signify end of entry
- Select required units

Backspace Key (BK SP):
- Back up one menu level
- Erase last character in data entry
Vertical Scale, Demodulator and Display Controls

- Toggles vertical scale between LIN and LOG modes.
- Initiates screen plot.
- Varies CRT brightness.
- Toggles power on (LED lighted) and off.

For more details, please refer to the diagram and labels on the page.
Press repeatedly to select LOG vertical scales in 10-5-1 dB sequence.

Controls volume of AM or FM demodulators.

Inner knob controls:
- Trigger level in Internal, Line and External modes
- Sweep position (manual scan mod)
- Picture framing (video monitor mode)

Toggles on-screen readouts on and off.

Option connector and indicator. LED is lighted when option is enabled.
Display Storage Controls

Activates MAX HOLD mode. In MAX HOLD mode the A & B registers (if active) retain the largest signals observed.

To enter waterfall mode:
- First clear the A, B, and C registers
- Press [SAVE ENABLE][D]

To exit, press [SAVE ENABLE][D].
Press to arm SAVE ENABLE, then press register A, B, or C to save or clear (unsave).

Toggles the indicated register (A, B, C, D) on or off, and saves (or clears) the display in the selected register when SAVE ENABLE is armed. Individual waveforms cannot be saved in the D register.

- Green LEDs light when indicated register (A, B, or C) contains a saved waveform, whether displayed or not.
- Red LEDs light when indicated register (A, B, C, D) is displaying a waveform.
Resolution BW and Sweep Controls

Decreases (↓) or increases (↑) the RES BW filter bandwidth.

Selects AUTO RES BW mode (LED lighted).

Activates the user-selectable video filter (LED lighted).
Decreases (↓) or increases (↑) the sweep rate in 1-2-5 sequence.

Press once to select single sweep mode. Press again to arm sweep. Sweep begins after next trigger signal.

Selects AUTO sweep rate mode (LED lighted).

RF input signal connector. OBSERVE MAXIMUM INPUT RATINGS.

Select fixed or AUTO Video Filter value: [UTIL][2][5].
Cancel single sweep mode: [AUTO].
Select HORIZ TV Line triggering: [SWP/TRIG][9].
